

ENVIRONMENTAL POLICY

Sparta Systems is a construction company based in Yorkshire working predominantly in the North of England, committed to caring for and protecting the environment in which we operate by pursuing a responsible and proactive attitude to improving environmental performance across all of our business activities. Sparta Systems contributes to sustainable development by balancing its business aims with environmental considerations and will encourage other stakeholders to join us in this effort.

This commitment is driven at all levels of the company and we devote time and resources to evaluating and reducing the effects that our work may have on the local environment.

Specifically, where it is within our control or influence Sparta Systems undertake to:

- Assess and minimise any negative environmental impacts, and maximise any positive impacts, of its operations.
- Develop management processes and operational procedures to prevent pollution.
- Reduce the effects of noise, dust, light, disturbance and inconvenience.
- Make efficient use of energy and water resources and reduce our carbon footprint.
- Reduce waste production and divert waste away from landfill by promoting resource efficiency, recycling, and the use of recycled and recyclable materials.
- Implement a continual improvement process by assessing and monitoring performance.
- Raise awareness of environmental issues through training and development of all employees and encourage initiatives that enhance environmental performance.
- Actively engage with main contractors, subcontractors, and suppliers to reduce the environmental impact of projects, increase knowledge and improve their environmental performance.

The directors regard this policy as fundamental to core business objectives, and therefore communicates it to all persons working under the control of Sparta Systems. It is their responsibility to support and apply those sections of the policy and procedures that relate to their activities.

Sparta Systems will also publish this environmental policy publicly.

Simon Jones – Project Director
On behalf of Sparta Systems Ltd
